

Program

The program will be highly interactive giving each attendant the opportunity to discuss with each other and build networks for future collaboration. Three internationally renowned keynote speakers will give talks from different perspectives which will be followed by “creative discussions”. During the discussion we will focus on key challenges in our country and/or our home institutions. Students will take part throughout the program giving their perspective. We encourage you to bring student representatives to the meeting!

The meeting will start Tuesday June 13th at 9.00 and ends Wednesday June 14th so that participants of ProPel have time to eat and walk to Konsert och congress (the venue of ProPel).
