The next iteration of Open Networked Learning, ONL191, will start 18 February 2019! We are preparing for another exciting course and hope you will join us!

Would you like to:
- Learn about how to create collaborative and flexible learning environments online?
- Learn about using Problem Based Learning in an open setting?
- Extend your professional network?
- Try different digital tools and methods in a pedagogical context?
- Get updated on research and trends in online learning?

If yes – here’s a course for you! ONL is an open course aimed at teachers, educational developers, learning technologists and course designers in Higher Education, who want to develop teaching using digital tools and learning environments. The course gives you the opportunity to explore and try collaborative learning in an open online learning environment with colleagues from different universities, disciplines and cultures.

PRACTICAL INFORMATION

📅 February 18 - May 12, 2019
⏰ 6-8 hours/week

COURSE TOPICS
1. Connecting, online participation and digital literacies
2. Open learning - sharing and openness
3. Learning in communities - networked and collaborative learning
4. Design for online and blended learning
5. Lessons learnt - future practice
